Foreword

As we reach the mid-point of our 2022-2025 Strategic Plan at Solihull College and University Centre, it is with great pride that we reflect on our progress and the successes we have achieved thus far. Our commitment to excellence, collaboration, and innovation has been unwavering, and the results speak for themselves.

One of the standout achievements during this period has been our recent Ofsted inspection in May 2024, where we were judged as 'Good' overall, with our contribution to skills being deemed 'strong.' We are particularly proud that we are the only general further education college within the Colleges West Midlands consortia to receive this highest judgement. This recognition not only affirms our dedication to quality but also highlights the significant impact we are making in the region by equipping our learners with the skills they need to thrive. Importantly, our impact on skills is also supporting businesses in our region by helping them upskill their staff and strengthen the talent pipeline of skilled individuals they need to meet emerging business requirements and build their future workforce.

Our reputation for quality excellence and collaboration has been further reinforced by our selection to lead the UK's largest Local Skills Improvement Fund project, across West Midlands and Warwickshire, a testament to our capability and leadership in driving regional skills development. Additionally, our representation at a wide range of events, as well as on regional and national boards—where some of our staff hold leadership positions—demonstrates the influence and respect we have garnered within the education sector.

While we have made remarkable strides, we recognise that there is still work to be done in the remaining 18 months of our strategic plan. Our focus remains on continuing our growth trajectory and advancing our significant investment and property strategy, ensuring that future cohorts of learners benefit from state-of-the-art facilities and an environment conducive to learning and personal development. We will also continue to improve learner outcomes and drive forward quality improvements across the College.

To further enhance our support for students, we have created the new role of 'Personal Development Coach' and recruited a team of 20 across the College. Additionally, we have appointed 'English and Maths Programme Managers' to bolster our ongoing efforts to enhance the quality of our Maths and English provision.

We are also proud of the culture we have cultivated at Solihull College and University Centre. Our ability to recruit and retain excellent staff, coupled with offering terms and conditions that exceed sector norms, has been a cornerstone of our success. It is this culture of excellence that propels us forward, ensuring that we remain at the forefront of further education and skills development.

As we look ahead, we remain committed to holding ourselves accountable for the success factors we identified under each of our strategic ambitions. Together, with our dedicated staff and stakeholders, we are confident that we will continue to achieve our goals and make a lasting impact on the lives of our learners and the broader community.
